

You don't want a job.
You want an exciting endeavour.

Our team at our head office in Kloten needs reinforcement with a

Senior and/or Professional Developer Java (E-Commerce)

OPO Oeschger AG is a leading fittings distributor in the field of furniture, kitchen, doors, buildings, as well as machines and tools supplying B2B customers. Ranking in the Top 10 B2B E-Commerce list. Strongest presence in Switzerland and Germany. We are building-up best in class Digital Business and have therefore created new positions for specialized professionals to join.

Your mission

You will be using new components selected from the best available software that are built around SAP Commerce (formerly known as Hybris). In order to implement and develop applications, features, and services of OPO's global e-platform you will make use of your professional expertise. We are developing a modern, fully responsive and headless e-commerce platform which will be release in Q1. You will help to continue building-up the new e-commerce platform and actively contribute to its successful rollout. Furthermore, you focus on enhancing functionality and you collaborate closely with the team to solve technical challenges. You ensure an effective implementation with respect to technical requirements, code quality, and performance. In this solid future oriented position you will report to the Head of Digital Business Development and will be part of OPO's fast growing IT Organization.

Your offer

- You hold a degree in Computer Science, Computer Technology or have completed a similar education.
- The ideal candidate has a few years of proven practical experience in project implementation and has in-depth software and web development/programming skills (Spring, Java/J2EE, SQL/NoSQL, Javascript/Ajax/jQuery, HTML, CSS), experience in the SAP Commerce Framework is a plus
- You convince with your innovative attitude in finding solutions and your strong business sense
- You are fluent in English and have basic skills in German

We deliver

- Exciting and varied challenges
- An innovative company culture
- You will have the chance to work with latest technologies and build up a state-of-the-art E-Platform
- A professional environment and support from the organisation

We look forward to receiving your complete application.
